INDEX OF ABSTRACTS
Volume 12, 1965

Abbott, J. C. See Pilling, D. L.

Abian, Alexander and Deever, D. L. On representation of partially ordered sets, 623; Representation of simply ordered sets and the generalized continuum hypothesis. I, 718; Representation of simply ordered sets and the generalized continuum hypothesis. II, 815.

Abian, Alexander and LaMacchia, S. E. On the existence of an empty set in set-theoretical models, 462.

Abramson, L. R. See Miller, K. S.

Accola, R. D. M. On automorphisms of compact Riemann surfaces. Preliminary report, 465.

Aczel, J. D. How the 23 functional-equations problems of 1963 stand now, 692.

Adams, R. D. A remark on coercive operators, 241.

Addison, J. W. The undefinability of the definable, 347.

Adler, Alfred. The six-sphere does not admit a complex structure. Preliminary report, 233.

Aggarwal, S. K. Inhomogeneous minima of indefinite binary quadratic, ternary cubic and quaternary quartic forms in fields of formal Laurent series. Preliminary report, 582; Analogue of a theorem of Khintchine in a field of formal Laurent series. Preliminary report, 620.

Ahlberg, J. H., Nilson, E. N. and Walsh, J. L. Generalized splines and the best approximation of linear functionals, 236.

Aks, S. O. See Gilbert, R. P.

Almgren, F. J. Jr. An interior regularity theorem for three-dimensional minimal surfaces in R^4 and an extension of Bernstein's theorem to nonparametric four dimensional minimal surfaces in R^5, 817.

Amir-Moez, A. R. Quasi-singular values of a matrix. Preliminary report, 102.

Anderson, A. G. Overdominance in a polygenic system, 68.

Anderson, G. D. Bounds for moduli of rings in 3-space, 209.

Anderson, G. R. On the law of the iterated logarithm, 318.

Anderson, L. W. and Hunter, R. P. Cross-sections and congruences in semigroups, 801.

Anderson, R. D. On sets homeomorphic to the countable infinite product of lines, 792.

Anderson, R. V. See DeCicco, John.

Anderson, T. and Divinsky, N. J. Lower radical properties, 311.

Andrews, G. E. Partition theorems related to the Rogers-Ramanujan identities, 694.

Angotti, Rodney. The projective invariants of the configuration of two lines and a third order differential element, 696.

Angotti, Rodney and Benedicty, Marie. The geometry of a third order differential element, 617.

Appling, W. D. L. Set functions and absolute continuity sets, 131; Summability of non-negative-valued set functions. Preliminary report, 221; Summability of real-valued set functions. Preliminary report, 365; A uniqueness characterization of absolute continuity, 609; Refinement--unbounded set functions and absolute continuity, 713.

Argabright, L. N. Invariant integrals on locally compact semigroups, 452.

Armentrout, Steve. Concerning point-like decompositions of S^3 that yield 3-manifolds, 90; Concerning cellular decompositions of 3-manifolds that yield 3-manifolds, 805.

Arnold, L. Convergence of lacunary random power series, 711.

Artzy, Rafael. Non-euclidean incidence planes. I, 212.

Arveson, W. B. Analyticity in operator algebras, Preliminary report, 239.

Asenjo, F. G. Dialectic logic, 694.

Askey, R. A. Uniform convergence of Legendre series. Preliminary report, 322.

Atkinson, F. V. Singularity of determinantal endomorphisms, 81.

Aubert, K. E. Harmonic analysis and real group algebras, 544.

Aull, C. E. Sequences in topological spaces, 222; Sequences in topological spaces. II, 463; Sequences in topological spaces. II, 571.

INDEX OF ABSTRACTS
Volume 12, 1965

Abbott, J. C. See Pilling, D. L.

MEETINGS OF THE AMERICAN MATHEMATICAL SOCIETY

Abstracts of Contributed Papers, 52, 209, 303 447, 544, 690, 786
Calendar of Meetings, 4, 184, 264, 400, 500, 660, 748
Preliminary Announcements
February: New York, New York, 31
April: New York, New York, 32; Chicago, Illinois, 188; Stanford, California, 190
June: Eugene, Oregon, 286
August: Ithaca, New York, 287, 404
October: Cambridge, Massachusetts, 523
November: Lexington, Kentucky, 665; Iowa City, Iowa, 666
December: Berkeley, California, 667
January: Chicago, Illinois, 668, 761

Program of Meetings
January: Denver, 5
February: New York, 185
April: Chicago, 265; New York, 272; Stanford, 281
June: Eugene, 401
August: Ithaca, 501
October: Cambridge, 661
November: Lexington, 749; Iowa City, 755
December: Berkeley, 757

Supplementary Programs, 49, 204, 300, 443, 540, 686, 784

MEMORANDA TO MEMBERS

Backlog of Mathematics Research Journals, 195, 527
Call for Surplus Journals and Books, 35
Chairmen, 51
Combined Membership List for 1965-1966, 539
Corporate Members, 201, 766
